Food Recall 15/09/2021

The Food Safety Association, Ireland have recently issued a recall on the following product:

- 1) **The Hemp Company, CBD Oil Original, 10ml.**
Batch no: 10-10-139, Best Before Date: 04/2021

The product identified by FSAI contains unsafe levels of delta-9-tetrahydrocannabinol (THC) based on the European Food Safety Authority (EFSA) acute reference dose.

The dosage instructions on all our labels have since been updated to reflect the guidance values identified in Feb 2020. However this product was already on the market prior to those changes and the labelling reflects the known dosage directions at that time.

In the unlikely possibility that any of your customers are still carrying stock of the out of date specified batch, we ask that these are removed from sale immediately and returned to us.

WE APOLOGISE FOR ANY INCONVENIENCE CAUSED TO CUSTOMERS

Since July 2020, all our CBD product bottles are inkjet printed with batch numbers and best before dates from our ISO22000 accredited supplier. Dosage directions also now reflect the up to date levels for THC provided by FSAI in Feb 2020. Please be assured that all current Hemp Company stock states dosage directions consistent with FSAI up to date instructions.
